SUMMARY

Aspiring Software Developer and Computer Science Engineering student with practical experience in developing full-stack web applications using the MERN stack. Good understanding of frontend development, backend APIs, database management, and authentication systems. Looking for an opportunity to start my career, enhance my technical skills, and contribute to a development team.

EDUCATION

Future Institute of Technology

2023 – Present

B.Tech in Computer Science and Engineering - CGPA: 7.38

Kolkata, India

PROJECTS

Bike & Scooter Rental System [🔗](#) | [MERN Stack](#)

July 2025 – Sep 2025

- Developed a full-stack rental platform handling **user authentication, bookings, and vehicle inventory**.
- Implemented **JWT-based authentication** and secure password hashing using bcrypt.
- Designed **RESTful APIs** for booking management and user operations.
- Optimized MongoDB queries improving data retrieval efficiency.

Myntra Clone (E-Commerce Platform) [🔗](#) | [MERN Stack](#)

Feb 2026 – Apr 2026

- Built a responsive e-commerce application with **product filtering, cart, and order management**.
- Developed backend APIs for handling users, products, and orders.
- Implemented secure login and session management.

Online Doctor Appointment System [🔗](#) | [MERN Stack](#)

Dec 2025 – Feb 2026

- Developed a full-stack healthcare platform with **role-based access** for patients and doctors to manage appointments.
- Implemented **secure authentication** using JWT and bcrypt to protect user data and sessions.
- Designed **RESTful APIs** for appointment booking, doctor scheduling, and user management.
- Built a **dynamic time-slot scheduling system** to prevent double booking and improve efficiency.

Notes Management System [🔗](#) | [MERN Stack](#)

Mar 2026 – May 2026

- Developed a secure MERN-based notes management system with **JWT authentication** and bcrypt for user data protection.
- Implemented full **CRUD functionality** enabling users to create, update, delete, and manage notes efficiently.
- Designed and integrated **RESTful APIs** for handling note operations and user-specific data.
- Built a **responsive React-based UI** ensuring smooth user experience and efficient note organization.

INTERNSHIP

Ardent Computing Pvt. Ltd. [🔗](#) | [Full Stack Web Development Intern](#)

June 2025 – August 2025

- Worked with React.js, JavaScript, Node.js, Express.js, and MongoDB to develop web application features.
- Created frontend components and integrated backend REST APIs.
- Performed debugging, testing, and database operations during application development.
- Gained experience with Git workflow and software development practices.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, SQL

Frontend Technologies: HTML, CSS, React.js, Tailwind CSS

Backend Technologies: Node.js, Express.js

Database: MongoDB

Libraries & Concepts: JWT Authentication, CRUD Operations, MVC Architecture

Developer Tools: Git, GitHub, VS Code, IntelliJ IDEA
